

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A bag comprising:
a multi-ply blank comprising:
an outer layer having at least one ply, the outer layer having at least one window cut therethrough; and
a polymeric inner layer adhesively adhered to the outer layer.
the tubular multi-ply blank being formed into the shape of a bag having a front, a back, two sides, a bottom, an interior surface and an exterior surface, the bottom being closed by folding portions of the blank and forming an adhesively secured quadrilateral and the transparent polymeric inner layer forming the bag interior surface.
2. (Original) The bag according to claim 1, wherein the polymeric inner layer is transparent.
3. (Original) The bag according to claim 1, wherein the polymeric inner layer is translucent.
4. (Original) The bag according to claim 1, wherein the outer layer and the inner layer have comparable size and shape, the inner layer being offset from the outer layer in at least one direction.
5. (Original) The bag according to claim 4, wherein the multi-ply blank is arranged into a tube, a portion of one surface of the outer layer being adhesively adhered to another surface of the outer layer.

6. (Original) The bag according to claim 5, wherein a surface of the inner layer proximate one longitudinally extending edge of the inner layer is adhesively adhered to a surface of the inner layer proximate to the other longitudinally extending edge of the inner layer.

7. (Original) The bag according to claim 4, wherein the outer layer comprises at least two plies, each ply having comparable size and shape, one of the at least two plies being offset from another of the at least two plies in at least one direction.

8. (Previously Presented) The bag according to claim 7, wherein a portion of each outer layer ply is adhesively adhered to itself.

9. (Cancelled)

10. (Currently Amended) The bag according to claim 1 [[9]], wherein the at least one window is positioned in one of the front, the back and the sides.

11. (Currently Amended) A bag comprising:

a multi-ply blank comprising:

an outer layer having at least one ply, the outer layer having at least one window cut therethrough; and

a transparent polymeric inner layer adhesively adhered to the outer layer, the outer layer and the inner layer having comparable size and shape, the inner layer being offset from the outer layer in at least one direction,

the multi-ply blank being arranged into a tube, a portion of one surface of the outer layer being adhesively adhered to another surface of the outer layer,

the tubular multi-ply blank being formed into the shape of a bag having a front, a back, two sides, a closed bottom, an interior surface and an exterior surface, the bottom being closed by folding portions of the blank and forming an adhesively secured quadrilateral and the transparent polymeric inner layer forming the bag interior surface.

12. (Original) The bag according to claim 11, wherein the outer layer comprises at least two plies, each ply having comparable size and shape, one of the at least two plies being offset from another of the at least two plies in at least one direction.

13. (Previously Presented) The bag according to claim 12, wherein a portion of each outer layer ply is adhesively adhered to itself.

14. through 18. (Cancelled)

19. (Currently Amended) A bag comprising:

four sides and a bottom, at least one of the four sides having at least one window therein, the four sides and the bottom enclosing a bag interior, the bottom being closed by folding portions of the blank and forming an adhesively secured quadrilateral,

the four sides and the bottom comprising an outer layer and a transparent polymeric inner layer adhered to the outer layer, the outer layer and the inner layer having comparable size and shape, the inner layer being offset from the outer layer in at least one direction, the outer layer having the at least one window cut therethrough, the transparent polymeric inner layer fully lining the bag interior.
